

T3 - Technion Technology Transfer

T3 is the technology transfer office of Technion - Israel Institute of Technology.

Entrepreneurship and commercialization are at the core of Technion innovation. As part of the Technion R&D Foundation (TRDF), T3 is a one-stop-shop for innovation and the expansion of Technion as a global hub for entrepreneurship startups and commercialization.

It is here that great ideas from the laboratory and faculty are protected, enhanced, accelerated and translated into products through dynamic processes of commercialization.

T3's activities include identifying and assessment of research projects with commercial potential, protection and maintenance of IP, facilitating sponsored research, collaborations with industry, licensing and the establishment of start-up companies based on Technion technologies and investment in Technion-affiliated companies.
